WORK EXPERIENCE

November 2018 – February 2018

QA Analyst

Eminus Software

- As QA, the main responsibility is to find and submit any issue related to the software.
- I am testing the Web application on Windows system using different test scenarios and run automated tests.
- I test the connectivity and validate the data inserted in the database tables using SQL
- Worked closely with all team members to ensure that each PBI is delivered according to the acceptance criteria.
- Testing different API and End points also the request body to validate the data and the correct behaviour.

Business or sector IT

June 2016 – November 2018

IT specialist, Test specialist

IBM

- As a Test specialist, the main responsibility is to find and submit any issue related to the software.
- I am testing the application on Windows and Unix operating systems using different test scenarios and run automated tests.
- I investigate logs in case of automated test failures, to see if it's an issue with the application or the script.
- Worked closely with all team members to ensure that each version is done before the deadline
- In each version of the product there are new challenges to reproduce and test the fixes using different environments setup.

Business or sector IT

April 2014 – May 2016

QA Analyst

Electronic Arts

- As a QA, the main responsibility is to find and submit any issue related to the game.
- I am offering support to the Software Engineers by creating and executing different test scenarios.
- Tested different API calls using a Rest Client
- Helped Developers to understand what area of the game is affected by each issue and what is the impact for end user.
- Worked closely with Software Engineers, Operations Team and other QA teams to ensure that each feature we delivered was clean and stable.
With each interaction between me and any other team i have evolved, obtained a bigger view of the project, and a better understanding of the process we have to take to ensure everything works as intended.

Business or sector IT
